

- ▶ Would you like to roll-out new releases of business-critical applications with the confidence that they will perform optimally?
- ▶ Do you want to understand how your systems will perform under real-world production conditions, including system limits, benchmarking and capacity planning?
- ▶ Would you like to leverage the right tools and processes to proactively focus on the speed, accuracy and capacity of your IT systems rather than troubleshooting and reacting to problems?

Utopia Solutions' Velocity Performance Testing services help clients solve these business challenges by ensuring your IT systems can handle the real world BEFORE they are exposed to it. All Velocity Performance Testing services utilize our Performance Testing Framework (PTF). The PTF includes our proven methodology and assets to ensure you receive the greatest value in the shortest time.

Utopia will scale our Velocity Performance Testing services to meet your specific IT needs. Whether you require a complete testing solution, knowledgeable training of your IT staff or ongoing testing support for your application initiatives, we can deliver the expertise, experience and value you expect.

### Service Offerings

#### Velocity – Performance Test Strategy

Our Performance Test Strategy service puts your organization on the path to effective and efficient performance testing. It is based on our proven assessment methodology and includes a detailed strategy covering testing objectives and scope, test environment and data management, and the supporting processes required to sustain long-term success. Our strategy service is perfect for organizations looking for a roadmap to build a successful performance testing function.

#### Velocity – Performance Test Implementation

Our Performance Test Implementation service provides a complete solution, from planning through execution and analysis. The Implementation service is ideal for organizations looking for a turnkey performance test. Implementation can include knowledge transfer to enable internal staff, or be combined with our performance test managed service for an outsourced solution.

#### Velocity – Performance Test Mentoring

Our Performance Test Mentoring service provides organizations with the knowledge and skills required to create and maintain a successful performance testing function. Our expert practitioners will lead your team through a hands-on project in your environment to ensure you develop skills relevant to your objectives.

#### Velocity – Performance Test Managed Service

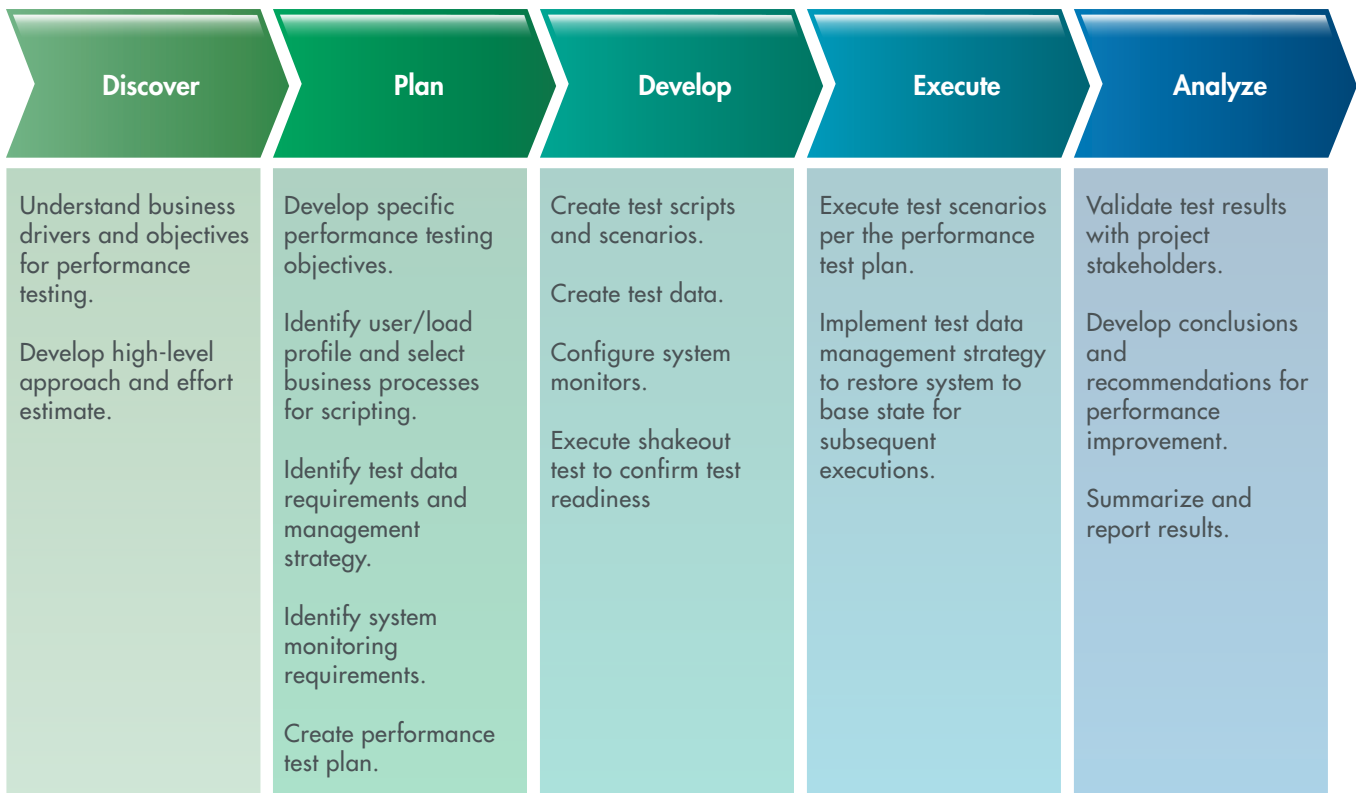

Our Performance Test Managed Service provides an effective and cost efficient performance test capability – without the risks and costs associated with developing performance testing internally.
